My Decision

My decision question (from the Start)

Am I ready to rent a house with land near Góis for twelve months, from June 2027?

My decision

Go and move

Must-haves met, and no dealbreakers broken?

All four essentials are met and no dealbreaker is broken. Neighbours is only partly met, and I accept that for a year.

Why: my three main reasons

The money works: a 29-month runway even before a single new client. The place held up on a second visit, in winter, alone. And staying costs me another four years of the same week.

My lights: which are green, which are amber, and which are red

Papers, Place and Plan B are green. Money stays amber until two clients sign. People stays amber until Lotte and I fix the dates.

Conditions that must be true before the big steps

The flat is rented out before I sign anything in Portugal, and the €8,000 reserve stays untouched.

Who decided with me, and do we agree?

Lotte knows and agrees. Hendrik has confirmed the work continues wherever I sit.

My first step

Sign the twelve-month rental on the house near Góis, after the November visit.

Date of my first step

4 May 2027

When will I review this decision?

1 December 2027, after the first winter

What would make me change it?

If neither new client signs by June and the costs hold at €2,360, I postpone by six months rather than start on a shrinking runway.

You have tested your plan against real numbers, real rules and real people, and you have made a decision. From here, the road splits: Step 4 if you move, and the staying route if you build the life you want where you are.

You will never be completely sure.

But you can be ready enough and know what to do next.
